Hanamkonda, Telangana, India

PROFESSIONAL SUMMARY

Software engineer and B.Tech Computer Science graduate (VIT-AP University, 2026) with three internships building full-stack web applications and AI-powered products. Ships features end to end, from React and Next.js interfaces to Node.js and FastAPI services, LLM integrations and cloud deployment. AWS, Oracle and Azure certified, and a fast learner.

EXPERIENCE

Intern Jul 2026 – Oct 2026
Inbotiq (Remote)

- Shipped features for a multi-tenant AI voice and messaging agent platform (Next.js, Node.js, PostgreSQL, Python FastAPI): multichannel campaign automation across 167 templates and a 5-step agent onboarding wizard. 227 commits, 29 PRs.
- Ran the first coordinated production release of 700+ commits across 3 services, including a zero-data-loss PostgreSQL schema migration and a new Azure App Service.
- Improved voice-agent reliability with 13 production fixes traced from call logs, all behind feature flags for safe rollback, and added a Gemini / GPT-4.1 LLM switch.
- Hardened billing (pre-send credit checks, coupon and overbilling fixes) and CI/CD (type-check gate, contract tests, secrets moved to GitHub secrets).
- Owned a production LLM extraction service (fine-tuned Qwen3-8B, SGLang, FastAPI, Azure A100) that processed 55.8M company records for a trade-data client; built Python and SQL Server pipelines that corrected 780K+ company names and 92% of client-flagged rows, with a backup and dry run before every write.
- Resolved production incidents (a 12-hour outage from a full disk, 242 failed batches from a duplicate container, a 30x slowdown from a faulty Azure host) and migrated the code and 16.4 GB model to the client's GitHub with all 399 tensors verified.

AI Full Stack Developer Intern May 2026 – Jul 2026
Ventu Renewable Private Limited (Remote)

- Deployed and optimized 8+ open-source LLMs (Qwen, Gemma, Devstral, Llama) on NVIDIA GPUs behind OpenAI-compatible APIs using vLLM, Ollama and llama.cpp, with KV-cache tuning and quantization.
- Built FastAPI and REST integrations that joined AI services, chat, image generation and productivity tools into one internal AI platform, with multi-agent workflows that use persistent memory and tools.
- Secured AI services with VPN-based access control and automated Linux monitoring and service recovery.

AI Training & Evaluation Intern Dec 2025 – Mar 2026
Scaler AI Labs (Remote)

- Trained and evaluated AI models with human-in-the-loop feedback, checking outputs against rubric-based criteria.
- Completed scenario-based tasks in Jira, Zendesk, Slack and SAP, following detailed SOPs and quality targets.

PROJECTS

ATScribe – AI Resume Analysis Platform | *React, Node.js, Express, MongoDB Atlas, Groq (Llama 3.3)* Live · GitHub

- Built a full-stack platform that scores a resume against a job description (overall, skill and semantic match), maps skill gaps, answers questions about the resume in chat and generates day-by-day preparation plans.
- Added a recruiter mode that parses a batch of PDF resumes and ranks candidates for a role, with validation that rejects non-resume uploads and exponential-backoff retries on API rate limits; deployed on Vercel and Render.

TheraCalm – Therapy Practice Website | *Next.js, TypeScript, Tailwind CSS, GSAP* Live · GitHub

- Designed and built a responsive multi-page site that helps a therapist earn visitors' trust and take bookings, with GSAP scroll-reveal animations, an animated pill navbar and accessible FAQ accordions.
- Added a validated contact form, Google Maps embed, SEO metadata (Open Graph, Twitter cards) and Google Analytics.

TECHNICAL SKILLS

Languages: Python, JavaScript, TypeScript, Java, SQL
Frontend: React.js, Next.js, Tailwind CSS, HTML, CSS
Backend & Databases: Node.js, Express, FastAPI, REST APIs, PostgreSQL, MongoDB
AI & LLMs: LLM APIs (OpenAI-compatible, Gemini, Groq), AI agents, prompt engineering, vLLM, Ollama
Cloud & Tools: Microsoft Azure, AWS, Linux, Git, GitHub Actions (CI/CD), Postman

EDUCATION

VIT-AP University – B.Tech in Computer Science and Engineering, CGPA: 7.98 2022 – 2026

CERTIFICATIONS

Oracle Cloud Infrastructure 2025 Certified Generative AI Professional · AWS Certified Cloud Practitioner Jul 2025
MongoDB Certified DBA Associate (Sep 2025) · Microsoft Azure Data Fundamentals, DP-900 (Jul 2024)
